PROFILE SUMMARY

Aspiring Software Development Engineer skilled in Java, DSA, and full-stack development, focused on creating efficient real-world solutions through clean and scalable code.

PROJECTS

Algorithm Visualizer – Interactive DSA Learning Platform

Interactive web application to visualize core data structures and algorithms. Implemented backend user sessions, dynamic dashboard, and REST API integration.

MegaMart – Online Shopping Platform (MERN Stack)

Developed a full-stack e-commerce platform using MongoDB, Express.js, React.js, and Node.js with authentication, role-based access, cart and order management.

MindMirror – A Personal Journal for Emotional Wellbeing

Designed a PHP-based web application to help users analyze emotional patterns and promote mental wellbeing. Integrated secure authentication, MySQL database, and Chart.js for mood-based analytics.

Smart Voting System – IoT & Hardware Integration

Developed an IoT-based smart voting system using ESP32, RFID, and PIR sensors, demonstrating hands-on experience in hardware integration. Implemented Firebase for secure voter authentication and enabled real-time voting updates through a web dashboard.
